The monthly benefits provided by SNAP enhance the foodpurchasing power of eligible low-income individuals and families. However, as described by many studies, including one by the Institute of Medicine, the greatest shortcoming of SNAP is that benefits for most households are not enough to get through the entire month without hunger or being forced to sacrifice nutrition quality.

Origins. The philosophical roots of participatory rural appraisal techniques can be traced to activist adult education methods such as those of Paulo Freire and the study clubs of the Antigonish Movement. In this view, an actively involved and empowered local population is essential to successful rural community development.
