2. Why we need non-dairy probiotics. Previously, health benefits of probiotics were fulfilled by milk/ other dairy products; however lactose intolerance, cholesterol content and allergic milk proteins are limiting factors in growth of dairy probiotics (Yoon, Woodams, & Hang, 2004). Total 75% of the world's population is suffering from lactose intolerance (Silanikove, Leitner, & Merin, 2015).

Terminology. In food use, from 1961, the term milk has been defined under Codex Alimentarius standards as: "the normal mammary secretion of milking animals obtained from one or more milkings without either addition to it or extraction from it, intended for consumption as liquid milk or for further processing." The term dairy relates to animal milk and animal milk production.
