

ELINT THE INTERCEPTION AND ANALYSIS OF RADAR SIGNALS

### **elint the interception and pdf**

Signals intelligence (SIGINT) is intelligence-gathering by interception of signals, whether communications between people (communications intelligence—abbreviated to COMINT) or from electronic signals not directly used in communication (electronic intelligence—abbreviated to ELINT). Signals intelligence is a subset of intelligence collection management.

NRC Handelsblad reported that The Netherlands is a 3rd party partner too, but presented no evidence for that. According to an article (pdf) by Dutch scholars it's not very likely that Dutch agencies are a formal 3rd party partner of NSA, as they have different political and cultural views. Nonetheless, the Netherlands has always been a loyal partner in military operations and so there is ...

Description. Les signaux peuvent être répartis en trois types principaux, et pour chacun il existe un terme : renseignement issu de l'interception de télécommunications, COMINT (Communications Intelligence) ; renseignement électronique, ELINT (Electronic Intelligence) : renseignement obtenu à partir des émissions électromagnétiques hors communications.

The Torus antenna is rectangular, instead of circular like the conventional satellite dishes. Its quasi-parabolic shape is actually a section of a geometrical shape called torus, which it gave its name. Where a conventional satellite antenna only has one receiving head, called a Low-Noise Block (LNB) downconverter, a Torus antenna has many of them, placed in an array.
