The First Mechanism: The Lever is a 2-bar Linkage The simplest mechanism, and perhaps the first, is a lever and a fulcrum. The lever is a link, the fulcrum a joint, and the ground is also a link. Together they form a 2-bar linkage. These simple elements (a tree branch and

In the context of network theory, a complex network is a graph (network) with non-trivial topological features—features that do not occur in simple networks such as lattices or random graphs but often occur in graphs modelling of real systems. The study of complex networks is a young and active area of scientific research (since 2000) inspired largely by the empirical study of real-world ...

This webinar series will feature individual research projects funded by the NIEHS Superfund Research Program (SRP). In 2013, the SRP initiated a targeted research program to better understand how contaminants in the environment are affected by complex biological, geological, and chemical processes. By understanding these complex interactions, we are better equipped to optimize remediation ...
