2. Detergents. The importance of detergents as tools for the study of membrane proteins cannot be underestimated. They are usually vital in the isolation and purification of the protein and are used in the primary solubilization step of reconstitution.

Membrane proteins, lipids and detergents: not just a soap

Chemicals can be found in many of the products we use in our everyday lives. Some chemicals pose risks to humans and the environment. Under the Toxic Substances Control Act (TSCA) and the Pollution Prevention Act, EPA evaluates potential risks from new and existing chemicals and finds ways to prevent or reduce pollution before it gets into the environment.

Chemicals under the Toxic Substances Control Act (TSCA)

Guidance on authorisation for pesticides used in Agriculture, Horticulture or the Home Garden (Plant Protection Products). Guidance on how to use these products safely and information about controls over pesticide residues in food.

Pesticides - Health and Safety Executive

Acidic. Acidic cleaning agents are mainly used for removal of inorganic deposits like scaling. The active ingredients are normally strong mineral acids and chelants. Often, surfactants and corrosion inhibitors are added to the acid. Hydrochloric acid is a common mineral acid typically used for concrete. Vinegar can also be used to clean hard surfaces and remove calcium deposits.

Cleaning agent - Wikipedia

A hand sanitizer or hand antiseptic is a non-water-based hand hygiene agent. In the late 1990s and early part of the 21st century, alcohol rub non-water-based hand hygiene agents (also known as alcohol-based hand rubs, antiseptic hand rubs, or hand sanitizers) began to gain popularity.
