

LIFE AT SHUTTER SPEED

### **life at shutter speed pdf**

Shutter speed: 1/1600th second (a fast shutter speed) All of the above is achieved by simply controlling the shutter speed. In summary, quick shutter speeds freeze action, while long shutter speeds create an effect of motion when you photograph moving objects.

### **Understanding Shutter Speed for Beginners - Photography Life**

In photography, shutter speed or exposure time is the length of time when the film or digital sensor inside the camera is exposed to light, also when a camera's shutter is open when taking a photograph. The amount of light that reaches the film or image sensor is proportional to the exposure time. 1 ? 500 of a second will let half as much light in as 1 ? 250

### **Shutter speed - Wikipedia**

In photography, a shutter is a device that allows light to pass for a determined period, exposing photographic film or a photosensitive digital sensor to light in order to capture a permanent image of a scene. A shutter can also be used to allow pulses of light to pass outwards, as seen in a movie projector or a signal lamp. A shutter of variable speed is used to control exposure time of the film.
