Harrison's Principles of Internal Medicine 20th Edition

Gray's Anatomy is an English language textbook of human anatomy originally written by Henry Gray and illustrated by Henry Vandyke Carter. Earlier editions were called Anatomy: Descriptive and Surgical and Gray's Anatomy: Descriptive and Applied, but the book's name is commonly shortened to, and later editions are titled, Gray's Anatomy. The book is widely regarded as an extremely influential ...

A genital tubercle or phallic tubercle is a body of tissue present in the development of the reproductive system. It forms in the ventral, caudal region of mammalian embryos of both sexes, and eventually develops into a primordial phallus. In the human fetus, the genital tubercle develops around week 4 of gestation, and by week 9 becomes recognizably either a clitoris or penis.

Origine. Il nervo tibiale è costituito da fibre delle divisioni anteriori dei nervi spinali L4, L5, S1, S2 e S3. I rami anteriori di questi nervi, assieme a parte di quello di S4, formano il plesso sacrale, il cui ramo terminale è appunto il nervo ischiatico, che oltre le già citate fibre tibiali raccoglie le divisioni posteriori da L4 a S2, le quali invece formano il nervo peroneo comune.
