

PRINCIPLES OF MODEL CHECKING SOLUTIONS MANUAL

principles of model checking pdf

In computer science, model checking or property checking refers to the following problem: Given a model of a system, exhaustively and automatically check whether this model meets a given specification. Typically, one has hardware or software systems in mind, whereas the specification contains safety requirements such as the absence of deadlocks and similar critical states that can cause the ...

Westphalian sovereignty, or state sovereignty, is the principle in international law that each state has exclusive sovereignty over its territory. The principle underlies the modern international system of sovereign states and is enshrined in the United Nations Charter, which states that "nothing should authorise intervention in matters essentially within the domestic jurisdiction of any state."
