Stitch and glue is a simple boat building method which uses plywood panels stitched together, usually with copper wire, and glued together with epoxy resin.This type of construction can eliminate much of the need for frames or ribs. Plywood panels are cut to shape and stitched together to form an accurate hull shape without the need for forms or special tools.

Product Description. The Nesting Eastport Pram has the same hull shape as the standard Eastport Pram, but it is split into two sections so that the forward section can nest completely in the aft section for compact storage.. The Eastport Pram is 7' 9", which is pretty small, but still not compact enough for storing aboard the smaller classes of cruising yachts.
