The use of effective communication among patients and healthcare professionals is critical for achieving a patient's optimal health outcome. However, according to the Canadian Patient Safety Institute, ineffective communication has the opposite effect as it can lead to patient harm. Communication with regards to patient safety can be classified into two categories: prevention of adverse events ...

Advanced trauma life support (ATLS) is a training program for medical providers in the management of acute trauma cases, developed by the American College of Surgeons. Similar programs exist for immediate care providers such as paramedics. The program has been adopted worldwide in over 60 countries, sometimes under the name of Early Management of Severe Trauma, especially outside North America.

Guidelines and Measures. This AHRQ microsite was set up by AHRQ to provide users a place to find information about its legacy guidelines and measures clearinghouses, National Guideline Clearinghouse TM (NGC) and National Quality Measures Clearinghouse TM (NQMC). This information was previously available on guideline.gov and qualitymeasures.ahrq.gov, respectively.
